

Self-Reporting Air Purifier

Innovation dossier

1. What is it?

A concept for the real 'Customer service / returns / warranty' friction, built with the INVERT design move - act before instead of after.

2. Physical architecture

Figure: [Concept visual](#)

Machine-composed schematic from the innovation's stored fields only (operator rule, friction stats, comparable envelope). Not a design rendering; a Fable render or drawing would also be CONCEPT_VISUAL, never a digital model or physical prototype.

artifact visual-customer_service:INVERT - /concept-visuals/customer_service_INVERT.svg

Product archetype

- room scale:** Unknown - no real data in this pipeline for this field.
- mobility:** Unknown - no real data in this pipeline for this field.
- size class:** Unknown - no real data in this pipeline for this field.
- power class:** Unknown - no real data in this pipeline for this field.
- noise ambition:** Unknown - no real data in this pipeline for this field.
- maintenance burden:** Unknown - no real data in this pipeline for this field.
- filter service dependency:** Unknown - no real data in this pipeline for this field.
- connected:** Unknown - no real data in this pipeline for this field.
- form factor:** tower

Design rule - each populated field follows from the operator's own fixed definition, never from evidence

System architecture

Unknown - no system-architecture dataset exists; the archetype above is a design rule from the operator's own definition.

Method choice

INVERT - Act before instead of after.

Method choice - authored design vocabulary

3. Why it exists

Reality Observed

0.34% of trusted reviews (36 reviews across 19 real products) carry this friction, with a -2.429* average rating gap. Signal: Customer service and warranty handling - a real, operational issue, not a research question.

Households whose real reviews carry this friction: 36 reviews across 19 real products (69.4% verified purchase, 2007-11-01-2023-07-17).

Unknown - no persona/behavioural dataset exists in this pipeline; only the review evidence above is real.

Transformation Method choice

METHOD CHOICE, not evidence: the authored operator table assigns INVERT - "Act before instead of after." - to this friction. Analyst design judgment, applied deterministically.

Product consequence Feasibility precedent

Feasibility precedent (from the trend corpus, not a consumer-evidence consequence): No real technical or regulatory document in this 12-document corpus addresses warranty/service-contact process design - this is a real gap, not an oversight: proactive-contact and no-ticket-replacement are organizational/process changes, not technology builds, and this pipeline has no real Versuni service-organization capability data to assess execution feasibility. Rating reflects LOW technical complexity only; organizational feasibility is genuinely unassessed here.

4. Evidence and lineage

Parent paths

No parent paths - this innovation cites no tension or assumption paths; its grounding is the friction evidence in section 3, why it exists.

evidence ids: taxonomy:customer_service

category assumptions: No category assumption shares a paper with this theme's signal evidence.

Design DNA

F consumer friction (taxonomy:customer_service) Present

Real Amazon review-text friction theme (see Consumer Pain methodology).

O design operator Method choice

Authored operator vocabulary applied deterministically (METHOD_CHOICE, not evidence) - see OPERATORS/THEME_OPERATORS in src/real/magic_box_real.py.

S signal (customer_service) Present

Customer service and warranty handling - a real, operational issue, not a research question.

T scientific tension Missing / unverified

No real research tension shares a paper with this theme's signal evidence.

R rival gap Missing / unverified

No real competitor-weakness data clears the white-space threshold for this theme.

C versuni capability Missing / unverified

No real Versuni internal capability/org-readiness dataset exists in this pipeline.

A category assumption Missing / unverified

No category assumption shares a paper with this theme's signal evidence.

E economic condition Present

Real price-weighted exposure computed for this theme (\$8,124.56).

5. Comparable products

comparable set: 10 verified official Versuni/Philips air-purifier families (room-scale)
clean-air delivery rate (CADR): 165-600 m3/h across 9 real comparables
source: individually verified official Versuni/Philips product pages (data/visual/product_images.json)
room coverage: 42-156 m2 across 9 real comparables
source: individually verified official Versuni/Philips product pages (data/visual/product_images.json)
minimum noise: 13-20.5 dBA across 6 real comparables
source: individually verified official Versuni/Philips product pages (data/visual/product_images.json)

6. Engineering envelope

metric	value from verified comparables	epistemic type
clean-air delivery rate (CADR)	165-600 m3/h (n=9 comparables)	Observed comparable
room coverage	42-156 m2 (n=9 comparables)	Observed comparable
minimum noise	13-20.5 dBA (n=6 comparables)	Observed comparable
target mass	No verified comparable publishes this value - left unknown, never estimated.	Unknown
target power	No verified comparable publishes this value - left unknown, never estimated.	Unknown
target dimensions	No verified comparable publishes this value - left unknown, never estimated.	Unknown

7. Economics

price-weighted exposure: \$8124.56

SUM of real observed listed prices across affected reviews with a known price. This is a RELATIVE exposure indicator, not a revenue or market-size estimate - it has no units-sold, conversion-rate, or time-period basis. It answers 'which friction touches more expensive products' not 'how much money is at stake per year.'

comparable market median: \$249.0 (n=11 products) - not this concept's price

MEDIAN real listed price across the 11 distinct real products affected by this friction that have a known price. This is what products in this segment actually cost today - not a proposed price for a new concept, which this evidence cannot establish.

target price: Not modelled - No concept target-price model exists - only the comparable market median (\$249.0, 11 real products) as reference. A target price would be invented.

8. Prototype

State: Concept visual

Concept visual means a schematic exists, nothing more: no digital model, no physical prototype, no test data.

Machine-composed schematic from the innovation's stored fields only (operator rule, friction stats, comparable envelope). Not a design rendering; a Fable render or drawing would also be CONCEPT_VISUAL, never a digital model or physical prototype.

9. Experiment and next learning

Next experiment

Real internal service-capacity data would let this split into a proper technical-feasibility rating plus a separate, currently-missing organizational-feasibility rating.

Kill criterion

No authored kill criterion yet for this innovation - only the formal case (see formal_case.abandon_signal) has a human-authored one; this innovation earns its own by developing further evidence or by a human decision to invest.

10. What could kill it?

Where this idea stands: rejected - graveyard

Killed in the Magic funnel: Not enough real complaint evidence - 0.34% is below the 0.5% floor.

kill criterion: No authored kill criterion yet for this innovation - only the formal case (see formal_case.abandon_signal) has a human-authored one; this innovation earns its own by developing further evidence or by a human decision to invest.

Uncertainties

- No real Versuni service-organization capability data (support headcount, current SLA, return-logistics cost) - organizational feasibility is genuinely unassessed, not just unfavourably assessed.

Critic dimensions

Evidence	Reject	Consumer Pain evidence-sufficiency gate failed - no real, materially-prevalent friction to build against.
Economic	Challenge	Real price-weighted exposure (\$8,125) is below the corpus median (\$16,113) - a real but comparatively modest signal.
Competitive	Needs evidence	No real rival-weakness data recorded for this friction theme.
Human	Needs evidence	No real usability/human-factors evidence exists in this pipeline for this concept.
Physical	Needs evidence	No real lab/engineering feasibility data exists in this pipeline for this concept.
Versuni fit	Needs evidence	No real organizational-capability assessment exists in this pipeline for this concept.
Timing	Needs evidence	No real market-timing/window evidence exists in this pipeline for this concept.
Robustness	Needs evidence	No real sensitivity/robustness study exists in this pipeline for this concept.

critic overall: Reject

Criteria results

Needs evidence: 36 - Pass: 8 - N/A: 4 - Challenge: 2 - Kill: 2

E3	Challenge	Signal state SINGLE_SOURCE_FAMILY - real, but not yet independently corroborated.
H2	Kill	gate_passed=False
C1	Kill	Not white space.
F3	Challenge	medium
